

# Borgelt B40 Vario User Guide

The Borgelt B40 vario is a simple to operate and understand instrument. It has a number of simple features to help give the pilot the needed information.

Volume is controlled using the volume knob.

The right hand switch controls whether audio is heard only in positive vario readings (Switch UP) or audio heard in the full range (Switch DOWN).

The left hand switch is a three position switch and is for power (down is ON/middle is OFF) and internal battery backup (UP if installed).

Pressing and holding the top button will show the 20 second average on the dial.
